Summary

- Results-driven computer science student with experience in developing and deploying scalable systems for startups.
- Strong expertise in programming languages such as Python and Dart.
- Proven track record of delivering high-quality software on time and within budget.
- Passionate about staying up-to-date with the latest technologies and industry trends.
- Strong interest in deep learning and UI/UX design.
- Knowledge of HTML, CSS, SCSS, JavaScript.

Education

- Bachelor of Engineering in Computer Science, Don Bosco College of Engineering, Expected graduation in 2025

Experience

- Software Engineer Intern, Neural Kissan (2022-Present)
  - Developed and maintained several large-scale systems.
  - Collaborated with cross-functional teams to deliver new features and improvements.
  - Assisted in the development of Neural Network for crop prediction.

Skills

- Programming languages: Python, Dart
- Frameworks: Flutter, Flask
- Deep Learning: TensorFlow, PyTorch
- UI/UX Design
- Web development: HTML, CSS, SCSS, JavaScript
- Bash scripting
- API development

Projects

- Personal Project:

- An AI assisted writer that helps in production of movie scripts with an AI generated preview.

  - Technologies used: Python, TensorFlow

- Personal Project:

- A mobile application that renders blender files from anywhere.

  - Technologies used: Dart, Flutter, Flask, Bash scripting, Ngrok
